

1999集集地震 與2022池上地震 週年紀念國際研討會

Anniversary Workshop in Commemoration of the

1999 Chi-Chi and 2022 Chihshang Earthquakes

The workshop has invited world renowned professors and experts from the United States, Canada, Japan, Slovenia, and the Philippines, to deliver special lectures on engineering seismology, earthquake engineering, and earthquake-induced disaster mitigation. These esteemed professors and experts will share their knowledge, insights, and research findings, providing valuable perspectives on the latest advancements in the aforementioned fields.

By bringing together a diverse group of professionals and researchers, the workshop aims to foster discussions on the latest advancements in earthquake engineering and disaster preparedness. The commemoration of past earthquakes serves as a reminder of the importance of continuous learning and preparedness for future events. Through collaborative efforts and the exchange of knowledge, the workshop seeks to enhance our understanding of earthquake-related phenomena, improve mitigation strategies, and develop more resilient communities. It is an opportunity for participants to share their research findings, engage in fruitful discussions, and work towards the common goal of minimizing the impact of earthquakes on society.

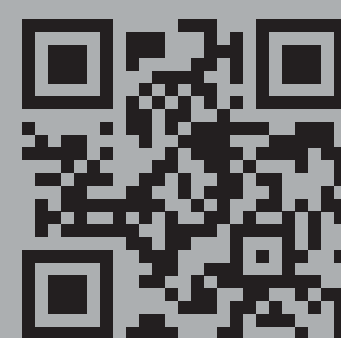

Time / September 25th to 27th, 2023

Venue / National Center for Research on Earthquake Engineering, Taipei, Taiwan.

Important Dates / Deadline for Registration: August 15th, 2023

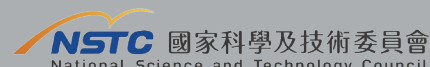

Topics /

- Engineering seismology
- Geotechnical earthquake engineering
- Seismic design, evaluation, and retrofit
- Advanced method for simulation
- Lessons learned from post-disaster response and recovery
